Warning messages:riate: 13/13 --- done.

1: Using an external vector in selections was deprecated in tidysselect 1.1.0.

❗ Please use `all_of()` or `any_of()` instead.

```
# Was:
data %>% select(tmp_covariate)
```

```
# Now:
data %>% select(all_of(tmp_covariate))
```

See <<https://tidyselect.r-lib.org/reference/faq-external-vector.html>>.

This warning is displayed once every 8 hours.

Call ``lifecycle::last_lifecycle_warnings()`` to see where this warning was generated.

2: ``funs()`` was deprecated in dplyr 0.8.0.

❗ Please use a list of either functions or lambdas:

```
# Simple named list: list(mean = mean, median = median)
```

```
# Auto named with `tibble::lst()`: tibble::lst(mean, median)
```

```
# Using lambdas list(~ mean(., trim = .2), ~ median(., na.rm = TRUE))
```

This warning is displayed once every 8 hours.

Call ``lifecycle::last_lifecycle_warnings()`` to see where this warning was generated.
